GENERAL DESCRIPTION

The PageKom Intercommunication System is a unique three channel, common talk-paging system which features two talk lines and a 'page only' third line. The telephone stations are available in both wall and desk models and are controlled by an unusual power supply capable of quick expansion.

MODEL PK100-W

A wall mounted telephone station with 500 style handset — paging switch on handset — hookswitch made of polished cast metal and mutes external speaker if desired — can page when 'talk' lines are busy — red and green busy lites — heavy gauge steel wall box with baked on finish — two contrasting colors to match handset — all nomenclature silk screened.

PK100-W

MODEL PK200-W

Similar to PK100-W except larger enclosure to accommodate 2½" speaker, 25 volt transformer and a screw drive adjust volume control — hook switch mutes internal speaker — transformer tapped at ½ and 1 watt.

PK200-W

MODEL PK300-D

Similar to PK-200-W except designed for desk use — entirely molded of high impact plastic — finished in attractive beige — use Model PK10-T terminal box.

PK300-D

MODEL PKC24-30

A power control unit using a full wave rectifier and pi-section filter — output is 24 volts and 3 amps — can serve up to 30 stations — a PS24-32 power supply can be added to serve up to 60 stations — extra 24V, 250 ma. available at external strip — extra SPDT contacts on page relay suitable for auxiliary equipment — potentiometer (screwdriver adjust) controls music input to amplifier — 115 vac convenience outlet available — complete instruction book available with each unit.

MODEL PK10-T

Terminal box for PK300-D station — complete with 10 conductor beige cable terminated with spade lugs — finish matching beige.

PK10-J

Junction box with 10 point barrier strip — all connections covered — finish beige.

SPECIFICATIONS

Models PK100-W, PK200-W and PK300-D

SPECIFICATIONS

Carbon transmitter — 200 ohm impedance
Dynamic receiver — 50 ohm impedance
Paging switch — SPDT
Channel selector switch — DP-3 position
Volume control — internal
Speaker muting contacts
Channel lites (28 volts) — red and green
Speaker — 2½", 1 oz. magnet
Transformer, 25 volts, ½, 1 watt taps
Screw terminal connections
Finish — all beige
Finish — beige & contrasting color

Model PKC24-30

Power input: 105-125 VAC, 60 Hz
Convenience outlet: 117 VAC, not switched
Power output: 24 VDC @ 3 amps — (operates up to 30 telephones)
External power input: 24 VDC up to 3 amps — (expands system for an additional 30 phones)
Auxiliary output power: 24 VDC @ 250 ma. fused
Fused circuits: Transformer primary, power to busy light circuits, auxiliary output power.
Relays: Plug-in type with plastic dust cover, DPDT, 24 VDC coil, 3 amp contact rating
Program input: Any background music source, internal level adjustment
Auxiliary contacts: SPDT contacts, actuated when paging
Terminations: Screw terminals for system wiring, phono plugs for amplifier and program source

H52 SERIES / H53 SERIES

H52 Series / H53 Series

CORD LENGTH: 5 feet
TRANSMITTER: Carbon-25 ohm
RECEIVER: Magnetic-600 ohm

The H52 series of Soundolier headsets are standard operator headsets — 52AW. The 53 series is the standard 53AW.

The H53 series can be used as a headset or as a handset when the headband is removed.

Both headsets contain a carbon microphone and a single dynamic earset. The headband is padded leather. The H52 and H53 Series are available with 2 types of connectors.

| | Connector Type |
|-------------|-------------------------|
| Model H52 | Dual Telephone Type |
| Model H53 | (289B) |
| Model H52-3 | Single 3 Connector Type |
| Model H53-3 | (310) |

15' COIL CORD

H152 SERIES

H152 SERIES

CORD LENGTH: 15' Coil Cord
TRANSMITTER: Carbon-25 ohm
RECEIVER: Magnetic 600 ohm

The H152 Series of SOUNDOLIER headset are the standard operator headset (52AW) but with a 15 foot coil cord for use in cueing system and for added mobility. The headset contains a carbon microphone and a single dynamic earset. Headband is padded leather. The H152 Series is available with your choice of several connectors.

| | Connector Type |
|--------------|------------------------|
| Model H152 | Dual Telephone Type |
| | (289B) |
| Model H152-3 | Single 3 Conductor |
| | (310) |
| Model H152-4 | XLP4-12 (4 pin male) |
| Model H152-5 | XLP4-11 (4 pin female) |
| Model H152-6 | XLP3-12 (3 pin male) |
| Model H152-7 | XLP3-11 (3 pin female) |

15' COIL CORD AND ON-OFF TOGGLE SWITCH

H252 SERIES

H252 SERIES

CORD LENGTH: 15' Coil Cord
TRANSMITTER: Carbon-25 ohm
RECEIVER: Magnetic 600 ohm
SWITCH: ON-OFF TOGGLE

The H252 Series of SOUNDOLIER headsets are the standard telephone supervisor type. Cord length is 15 foot complete with on-off toggle switch. Used extensively for cueing systems, TV cameramen, etc. The headset contains a carbon microphone and a single dynamic earset. The H252 Series is available with your choice of several connectors.

| | Connector |

| Model H252-7 | XLP3-11 (3 pin female) |

PLASTER RINGS / PLASTER FRAMES

Soundolier offers you complete flexibility in designing your sound installation.

With 30 styles and sizes to choose from, you're sure to find the answer to your need in our expanded plaster ring and frame line.

75, 76 SERIES PLASTER RINGS

The 75 and 76 series are circular units. They are available with or without mounting ears.

- E1 suffix indicates mounting ears for 16" stud centers.
- E2 indicates mounting ears for 24" suspended ceilings.

The 75 series has threaded rivet baffle fasteners. They are also available with torsion spring locks (T prefix).

The 76 series has convenient speed nuts. The following sizes and styles are available:

| Cat. No. | O.D. | I.D. | Mounting | | Mounts Baffle # |
|----------|------|------|----------|------|---|
| | | | Depth | Ears | |
| 75-6 | 8½" | 7" | ¾" | | 60-5,60-6,61-5,61-6 68-6,162-6 |
| 75-8 | 9⅞" | 8⅞" | ¾" | | 10-8,12-8,15-8,17-8,51-8 60-8,61-8,63-8,M222,66-6 67-8,68-8,162-8,63-8,170-8 165-8,460-8 |
| T75-8 | 9⅞" | 8⅞" | ¾" | | T60-8,T61-8,TM222-8,T51-8 T610-8,T710-8,T720-8 |
| 75-8E1 | 9⅞" | 8⅞" | ¾" | 17" | same as 75-8 |
| T75-8E1 | 9⅞" | 8⅞" | ¾" | 17" | same as T75-8 |
| 75-8E2 | 9⅞" | 8⅞" | ¾" | 23½" | same as 75-8 |
| T75-8E2 | 9⅞" | 8⅞" | ¾" | 23½" | same as T75-8 |
| 75-10 | 12½" | 10½" | ¾" | | 66-8 |
| 75-12 | 14½" | 12½" | ¾" | | 60-12,60-10,61-10,61-12 162-10,162-12,66-12,63-10, 63-12,66-10,66-12,165-12 |
| 76-8 | 11⅞" | 10⅞" | ¾" | | same as 75-8 |
| 76-8E1 | 11⅞" | 10⅞" | ¾" | 17" | same as 75-8 |
| 76-8E2 | 11⅞" | 10⅞" | ¾" | 23½" | same as 75-8 |

71, 72 SERIES PLASTER FRAMES

The 71 and 72 series are rectangular plaster frames.

Both units are available with a choice of threaded rivets or torsion spring locks (T prefix) to hold baffles in place. They are available with or without mounting ears.

- E1 suffix indicates mounting ears for 16" stud centers.
- E2 indicates mounting ears for 24" suspended ceilings.

The following sizes and styles are available:

| Cat. No. | O.D. | I.D. | Mounting | | Mounts Baffle # |
|----------|------|------|----------|------|------------------|
| | | | Depth | Ears | |
| 71-8 | 11⅞" | 10⅞" | ¾" | | 164-8,168-8 |
| T71-8 | 11⅞" | 10⅞" | ¾" | | T164-8 |
| 71-8E1 | 11⅞" | 10⅞" | ¾" | 17" | 164-8,168-8 |
| T71-8E1 | 11⅞" | 10⅞" | ¾" | 17" | T164-8 |
| 71-8E2 | 11⅞" | 10⅞" | ¾" | 23½" | 164-8,168-8 |
| T71-8E2 | 11⅞" | 10⅞" | ¾" | 23½" | T164-8 |
| 72-8 | 10⅞" | 9⅞" | ¾" | | 160-8,161-8,P912 |
| T72-8 | 10⅞" | 9⅞" | ¾" | | T161-8,T620-8 |
| 72-8E1 | 10⅞" | 9⅞" | ¾" | 17" | same as 72-8 |
| T72-8E1 | 10⅞" | 9⅞" | ¾" | 17" | same as T72-8 |
| 72-8E2 | 10⅞" | 9⅞" | ¾" | 23½" | same as 72-8 |
| T72-8E2 | 10⅞" | 9⅞" | ¾" | 23½" | same as T72-8 |

73 SERIES PLASTER FRAMES

The 73 series plaster frames are rectangular units available with or without mounting ears for easy installation.

- E1 suffix indicates mounting ears for 16" stud centers.
- E2 indicates mounting ears for 24" suspended ceilings.

They are available in the following sizes and styles:

| Cat. No. | O.D. | I.D. | Mounting | | Mounts Baffle # |
|----------|------|------|----------|------|-----------------|
| | | | Depth | Ears | |
| 73-8 | 9⅞" | 8½" | ¾" | | 169-8 |
| 73-8E1 | 9⅞" | 8½" | ¾" | 17" | 169-8 |
| 73-8E2 | 9⅞" | 8½" | ¾" | 23½" | 169-8 |

* This dimension is opening in ceiling.

** These units have nailing holes for 16" O.C. stud mounting.

T175 SERIES PLASTER RINGS

The T175 series plaster rings are circular units available with or without convenient mounting ears.

- E1 suffix indicates mounting ears for 16" stud centers.
- E2 indicates mounting ears for 24" suspended ceilings.

Torsion Spring locks are standard.

They are available in the following sizes and styles:

| Cat. No. | O.D. | I.D. | Mounting | | Mounts Baffle # |
|----------|------|------|----------|------|-----------------|
| | | | Depth | Ears | |
| T175-8 | 9⅞" | 8⅞" | ¾" | | T730-8 |
| T175-8E1 | 9⅞" | 8⅞" | ¾" | 17" | T730-8 |
| T175-8E2 | 9⅞" | 8⅞" | ¾" | 23½" | T730-8 |

178 SERIES PLASTER FRAMES

The 178 series plaster frames are rectangular units featuring threaded rivet baffle fasteners. They are finished in a rust preventative coating.

| Cat. No. | Dimensions | Mounts Baffle # |
|----------|------------|------------------|
| 178 | 23" x 15" | 800-8, 800-12 |

The "W" Series is a telephone handset/hookswitch assembly utilizing a thermo-plastic cup cradle mounted on an attractive 2 gang or 4 gang brushed stainless steel plate. The assembly has a '500' style handset. Switching consists of 2 form 'C' switches (DPDT). The entire assembly is wired to a terminal strip located on rear of plate, with all leads color coded and equipped with spade lugs for quick modification. Models WE-O and WB-O utilize a special mounting plate for use with Soundolier telephone enclosures.

| | | | |
|---------|------|--------|-------|
| Models: | WE-2 | 2 Gang | Beige |
| | WE-4 | 4 Gang | Beige |
| | WB-2 | 2 Gang | Black |
| | WB-4 | 4 Gang | Black |
| | WE-0 | — | Beige |
| | WB-0 | — | Black |

The TPS24-20 is a combination low voltage AC and Talk voltage power supply designed to power most common talk telephone intercom systems. A retard coil is included in the talk voltage circuit. Ventilated cover is included.

SPECIFICATIONS

Input power: 117 VAC @ 60 Hz.
Output power:
Talk Voltage: 6, 12 & 24 VDC @ 2 amps
AC Voltage: 6, 12 & 24 VAC @ 2 amps
Ripple (talk voltage): less than .125% (30 MV RMS) @ 2 amps

TELEPHONE STATIONS—METAL HANGER TYPE

Series "C" is a complete handset/hookswitch assembly utilizing an attractive chrome hook mounted on either a 2 gang or 4 gang brushed stainless steel plate. The assembly has a "500" style handset. Switching consists of 2 form "C" switches (DPDT) completely wired to a terminal strip located on rear of plate. All leads are color coded and equipped with spade lugs for quick modification.

| | | | |
|---------|------|--------|-------|
| Models: | CE-2 | 2 Gang | Beige |
| | CE-4 | 4 Gang | Beige |
| | CB-2 | 2 Gang | Black |
| | CB-4 | 4 Gang | Black |

"500" STYLE HANDSET WITH PUSH-TO-TALK BUTTON

Series "PT" is a standard "500" style handset with the addition of a push-to-talk button located conveniently on the handset. The switch contact arrangement is form "C" (SPDT) and is wired as form "A" (SPST), thus making it ideal for use in relay control, two-way radio or other switch applications. Available on all Soundolier hook-switch assemblies. Add suffix-PT to model number. (Example WE-2PT or CB-4PT)

TELEPHONE INTERCOM HOUSINGS

Models TRE-1 and TSE-1 are special recessed and surface enclosures for use with telephone intercom stations. Housings feature hinged front door with cylinder locks. Model TRC-1 is a recessed telephone housing without front door. Models TS302 and TS304 are 2 gang and 4 gang surface enclosures finished in attractive beige.

| Model | Telephone Unit | Plaster Ring | Dimensions |
|-------|----------------|--------------|---------------------------|
| TRE-1 | WE0 | TF-1 | 7" x 12" x 3 3/4" |
| | WB0 | — | |
| TSE-1 | WE0 | — | 8 5/8" x 13 7/8" x 3 3/4" |
| | WB0 | — | |
| TRC-1 | WE0 | TF-1 | 7" x 12" x 3 3/4" |
| | WB0 | — | |
| TS302 | WE2, | | 4 1/4" x 4 5/8" x 2 1/2" |
| | WB2 | | |
| TS304 | WE4, | | 4 1/2" x 8 1/4" x 2 1/2" |
| | WB4 | | |

DESK INTERCOM STATION—"500" STYLE

Model DP-1 is a "500" style desk phone designed for integration into virtually any telephone intercom system. The desk phone is furnished less ringer, induction coil and dial but supplied with a dial blank. 2 form "C" switches (DPDT), transmitter and receiver are completely wired to a terminal block located in the interior of phone. Spade lugs are also supplied for quick modification.

Model: DP-1
Color: Beige

NOISE-CANCELING TRANSMITTER

Series CX is a noise-cancelling telephone transmitter designed to acoustically cancel background noise. Ideal for use in telephone intercoms in high noise level areas. It is directly interchangeable with the transmitter element in an "500" style handset. Available in beige or black.

Models: CX-E Beige
CX-B Black

OPERATOR'S HEADSET

Operator Headsets

See page 3 for our complete line of Operator Headsets

REGULATED POWER SUPPLY

RPS24 SERIES

DESCRIPTION

The RPS24 Series is a series regulated DC power supply offered in three sizes. The RPS24-40 has a voltage range of 22 to 32 volts and delivers 4 amperes. The RPS24-20 has a voltage range of 22 to 32 volts and delivers 2 amperes. The RPS24-10 has a voltage range of 22 to 26 volts and delivers one ampere. The change in output voltage is less than 350mv, 150mv and 150mv respectively from no load to full load and the ripple is less than 1.2mv. The RPS24 series is ideal for dial telephone systems and transistorized equipment.

SPECIFICATIONS

AC-DC POWER SUPPLY

FPS24 & CFPS24 SERIES

DESCRIPTION

The Model FPS24-20 is a combination low voltage AC-DC power supply with a convertible DC and a multiple AC output. The DC output delivers 24 volts, 12 volts and 6 volts at 2 amperes while the AC output simultaneously delivers 2 amperes at each voltage listed. DC voltage tap conversion is easily accomplished through a plug-in lead. Suitable in some telephone, intercom and annunciator applications. Available with a ventilated cover—see model CFPS24-20.

DC POWER SUPPLY

PS24-20 PS24-05

DESCRIPTION

The Model PS24-20 is a convertible DC power supply delivering 2 amperes at 24 volts, 12 volts or 6 volts. Conversion is easily accomplished through a plug-in lead. The filter is designed with a choke input for improved regulation. The primary of the transformer is fused and the unit is shipped complete with a 6 ft. power cord. The Model PS24-05 is a DC power supply delivering 1/2 amperes at 24 volts. Similar to the PS24-20 except the choke is removed and the extra taps are not available.

SPECIFICATIONS

| | |

DC POWER SUPPLIES

HEAVY DUTY

PS24-100, PS24-50, PS24-32

DESCRIPTION

The models PS24-100, PS24-50 and PS24-32 power supplies are capable of delivering 10 amps, 5 amps and 3.2 amps respectively at 24 VDC. All models are fused in the input and output—output fuses are defeat proof. All models have solid state silicon rectifiers, choke input filters and bleeder resistors for better regulation. All terminals are barrier type, rubber feet are provided, each have two key-hole slots on the back and all are completely covered. Positive and negative terminals are isolated from ground. Complete with six foot power cord.

The PS24-07 power pak is specifically designed to mount to the RP22 series — see photograph. Specifications are given below.

PS24-07 mounted to RP22 series.

SPECIFICATIONS

Input Power: 117 VAC, 60 cycles, 18 watts
 Output Power: Nominal 24 VDC at .7 amps
 Ripple: Less than 7½% at full load
 Size: 4½" x 3½" x 2½"
 Terminals: Plus, Minus, Ground (minus isolated from ground)
 Finish: Cadmium plated with gold iridescent finish

DESCRIPTION

The Series RP22 "RELAY PAKS" consist of completely enclosed sets of Potter-Brumfield relays which are internally wired to eight point screw terminal strips. They are available in multiples of two relays and up to 10 per pak. However, each relay is individually terminated on an eight point screw terminal strip which is silk screened with the proper nomenclature.

The RP22 Series "RELAY PAKS" utilize the revolutionary Soundolier "Instant Mount" technique. Each chassis is equipped with double face pressure sensitive foam tape. Tools and unsightly screw heads are eliminated. Mounting holes are provided if "Instant Mount" is not utilized. The relays used in the paks are all 24 VDC DPDT and manufactured by Potter-Brumfield. The coils may be externally paralleled to obtain any number of poles with double throw action or they may be connected in series to obtain one 48 volt 4PDT relay. The combinations are endless.

SPECIFICATIONS:

| Model | No. of Relays | No. of 8 Point Screw Terminals | Dimensions |
|---------|---------------|--------------------------------|------------------|
| RP22-2 | 2 | 2 | 3½" x 4½" x 2¼" |
| RP22-4 | 4 | 4 | 6⅞" x 4½" x 2¼" |
| RP22-6 | 6 | 6 | 10¼" x 4½" x 2¼" |
| RP22-8 | 8 | 8 | 13⅝" x 4½" x 2¼" |
| RP22-10 | 10 | 10 | 17" x 4½" x 2¼" |

RELAY SPECIFICATIONS:

Type: 24 VDC, DPDT
 Contacts (material): Silver Alloy—Gold Flashed
 Contacts (rating): 5 amps
 Power requirements: 24 VDC, 60 ma.

PLUG-IN RELAYS

PR-22

The model PR-22 is a plug-in relay utilizing a 24 VDC DPDT relay manufactured by Potter-Brumfield. It is enclosed in a plastic dust cover with the contact configuration silk screened on the body.

SPECIFICATIONS

Type: 24 VDC, DPDT, Plug-in
 Dimensions: 2½" x 1⅝" x 1⅝"
 Contacts (material): Silver alloy—Gold Flashed
 Contacts (rating): 5 amp.
 Power requirements: 24 VDC, 60 ma.
 Other specifications: Enclosed plug-in type

GENERAL PURPOSE RELAYS

OR-22

The Model OR-22 is a general purpose DPDT 24 VDC relay manufactured by Potter-Brumfield.

SPECIFICATIONS

Type: 24 VDC, DPDT
 Dimensions: 1¾" x 1⅝" x 1⅝"
 Contacts (material): Silver alloy—Gold Flashed
 Contacts (rating): 5 amp.
 Power requirements: 24 VDC, 60 ma.

RELAY CHASSIS

PRC SERIES

The model PRC-1 is a single relay chassis which features a single socket for the PR-22 thus providing a convenient means of connecting to the contacts of a plug-in relay. The chassis has eight point screw terminals thus eliminating all soldering. The terminal strip is completely wired to the socket at the factory. The terminals are clearly labeled for quick contact identification. The convenience of the plug-in feature of the PR-22 is, of course, utilized. The chassis is constructed of heavy gauge CRS and is finished in a cadmium plate with a gold iridescent finish.

The model PRC-2 is a chassis similar to the PRC-1 but is enlarged to accommodate two plug in relays. Of course, you may use only one socket and relay and utilize the second as a spare. In addition, the PRC-2 can be mounted on the Soundolier MR-1 mounting rails. You may mount up to 10 relays on a 19" rack panel or elsewhere in the cabinet.

 6¾" x 3⅝" x 1⅝"
 2 - 8 terminal

MOUNTING RAILS

The Model MR-1 is a mounting rail set used to conveniently mount most of the Soundolier chassis mounted electronic products. The rails eliminate exposed screw heads on rack panels and reduce mounting time. Construction is of CRS and coated for rust prevention. Length is 17" for convenient mounting on 19" rack panels.

The Model PSRM-1 is a chassis containing a DPDT Potter-Brumfield relay with a built-in power supply. The relay is terminated on a six position terminal strip and two additional terminals are provided for an external switch to actuate the relay. The PSRM-1 utilizes the revolutionary Soundolier "Instant Mount" technique. (See Series RP for description.) The unit is furnished complete with a 6 ft. power cord.

SPECIFICATIONS

Input Power: 117 VAC, 60 cycles, 4 watts
 Power Supply output: 24 VDC, 150 ma
 Relay type: 24 VDC, DPDT
 Relay contacts: Silver Alloy—Gold Flashed
 Relay contact rating: 5 amps
 Relay power requirement: 24 VDC, 60 ma
 Termination: 8 point, screw type (2 for external switch, six for relay contacts)
 Size: 4" x 4 3/8" x 2 1/4"
 Finish: Cadmium plated with gold iridescent finish
 Mounting: "Instant Mount" or with mounting holes

TONE GENERATOR

The GPS750, GPS610 and G610 tone generators are completely solid state. The GPS750 and GPS610 have built-in power supplies. The G610 does not. The GPS750 produces a steady tone, pulse tone or a siren tone. The GPS610 and G610 produce only a steady tone. All tones are adjustable. All generators are actuated by an external SPST switch. On the GPS750, the siren takes precedence over the pulse and the pulse takes precedence over the steady. A square wave output is available on the GPS750.

COMMUNICATIONS CONTROL CENTER

The Series MPC is a communications control center featuring six or twelve DPDT switches mounted at the factory on a blank panel set attractively in a handsome wood cabinet. The panel is .050 aluminum with a beautiful satin finish. The switches exhibit black plastic paddle handles molded to the lever. Attractive name strips are provided with a clear plexiglass finish. The MPC-106 has six mounted switches, the MPC-112 has twelve mounted switches. The MPC-206 and MPC-212 are factory wired (see specification sheet). The MPC-100 has a blank panel without switches. All models are designed to be used with the PSR series.

ZONE PAGE POWERED RELAY PAK

The Series PSR is a zone page powered relay pak with six or twelve factory mounted Potter-Brumfield relays wired to an internal power supply. Excess current is available for external relays or lights. Any relay may be easily converted to an all page relay by connecting the off bus to the selected relay switch output (see specification sheet). The PSR-206 has six relays while the PSR-212 has twelve. All terminals are easily identified by a clear silk screened diagram. Complete with a 6 ft. power cord.

AUTO TRANSFORMERS AND OTHER ATTENUATORS

Soundolier attenuators are available in nine different models, from the low insertion loss and high power capabilities of the auto transformer to the low power requirements and economy of the wire wound potentiometers. All models are mounted on beautifully brushed specification grade stainless steel plates with standard countersunk mounting holes for box mounting. A handsome skirted knob and paint filled dial scale complete the assemblies.

Series AT auto-transformer attenuators are the quality and convenience approach to sound design. Impedance calculations are unnecessary. They can be used with any load on a 70.7 volt or 25 volt line. They are available in three sizes, 10 watt (AT-10), 35 watt (AT-35) and 75 watt (AT-75). All models have an excellent frequency response

Series TA T-pads and LA L-pads utilize the superior matching capabilities of the T and L pad configuration. They are available in two impedances, 1500 ohms and 8 ohms, and are capable of handling 3 watts D.C. The 8 ohms pads are used in voice coil cir-

Series VC potentiometer attenuators are especially designed for use in low power speaker circuits when an economical level control is needed. They are available in two impedances, 5000 ohms and 50 ohms, and are capable of handling 3 watts D.C.

and extremely low insertion losses. Attenuation is accomplished in ten steps with positive off position. There is no stop between the maximum and off positions thus preventing damage to the switch. The switch contacts are silver plated virtually eliminating noise and loss. Plate mounting, dial scale and knob are furnished as described above.

cuits while the 1500 ohms pads are used in the line circuits. Soundolier L and T pads are continuously variable (no stops) thus preventing possible damage. Plate mounting, dial scale and knob are furnished as described above.

The 50 ohm potentiometers are used in voice coil circuits while the 5000 ohm potentiometers are used in line circuits. Plate mounting, dial scale and knob are furnished as described above.

RACK MOUNTING—Soundolier attenuators are available with a 2" square dial scale plate for panel mounting. Suffix model number with —RM.

DELUXE PRIORITY ATTENUATORS

PA SERIES

LINE MATCHING TRANSFORMERS

The PA Series attenuators are designed to allow the user to set the program level on selected emergency, paging, etc. signals at the amplifier and to by-pass the effect of the attenuator. This eliminates the need for dual voice coil speakers or separate speaker systems. The entire line of Soundolier attenuators is available with the priority program feature. The PA Series attenuators are standard Soundolier attenuators with the addition of a SPDT relay securely mounted to the attenuator and properly wired. When the priority program is switched in, the relay by-passes the attenuator. The relay is operated with 24 VDC, at 5 ma. The unit has five color coded leads which are stripped tinned for easy hook-up. The plate mounts to most standard electrical outlet boxes. A protective cover for the relay insures a long, trouble free life.

Attenuator specifications are the same as described in the section above. HOW TO ORDER: All Soundolier standard attenuators are available as deluxe priority attenuators. Simply add -PA after the model number of standard attenuators. Example — AT35-PA, TA1500-PA, VC5K-PA, etc.

Series LT line matching transformers are American made and are low in distortion and high in efficiency. The primary leads are color coded, stripped, tinned and ready for wire nuts while the secondary leads are tinned and ready for soldering. Power taps are clearly labeled.

| Cat. No. | Primary | Taps |
|----------|------------|----------------|
| LT70 | 70.7 volts | C, .5, 1, 2, 5 |
| LT25 | 25 volts | C, .5, 1, 2, 5 |

SOUNDOLIER WALL PLATES

Soundolier wall plates are available in a variety of materials and sizes. They may be punched with 3/8" holes, furnished with a 3/8" polyethylene grommet or punched for a number of Cannon, Switchcraft or Amphenol connectors. All plates are avail-

able in box or strap mounting with the proper hardware included. Mounting holes are countersunk for 6-32 screws. Mounting yokes may be ordered separately when strap mounting is selected.

| | 602-14C | 6 | 2 | 622-14C | 6 | 2 |

Material prefixes—Same as standard wall plates without connectors.
See above.

No. 238 mounting yokes may be purchased separately or with plates having strap mounting hole centers. Mounting centers are 3-9/32" for mounting to box and 2-3/8"

for mounting the plate to the yoke. Hardware is furnished. Standard packaging is 10 per carton and 100 per master.

INTERCOM WALL PLATES

Series 2000 intercom plates are available in two and three gang models. The plates are of specification grade stainless steel with a beautiful brushed finish. Speaker mounting holes are available for 2-1/2" or 3" models. Plate mounting holes are stan-

dard and countersunk for 6-32 hardware. All plates use box mounting (3-9/32"). Plate mounting hardware is furnished. You may use 1/4" mounting holes with cup washers. Suffix catalog number with CW. Switch mounting hole is 15/32".

Lettering styles as shown on intercom station assemblies available on request.

GENERAL DESCRIPTION

Here are prepackaged intercom assemblies from Soundolier that offer economy, convenience and variety—all from a single source. Over 16 different models of two and three gang assemblies are available with components mounted and ready for your individual wiring. The plates are of specification grade stainless steel with a beautiful brushed finish. The high quality speaker is a 3" model with an efficient 1.47 oz. magnet. Rivets mount the speaker securely to the plate. One or two momentary action single pole double throw type

switches are available which can be wired in the normally open or closed position. A six screw terminal strip with brass tinned solder lugs is riveted to the speaker for flexibility in wiring when switches are employed. All assemblies may be mounted to standard outlet boxes. Special intercom assemblies, pre-wired or with components only, are available upon request. Other materials such as aluminum or brass may be used and other forms of lettering such as silk screen and engraving are available. Write for full particulars.

RECESS MOUNTING—Series 3000 recessed intercom stations mount to conduit outlet boxes utilizing plaster rings of the required number of gangs. Masonry type boxes of the proper size can also be used. The total depth required for two and three gang models is $2\frac{1}{4}"$. All components listed on the chart below are pre-mounted at the factory. Specifications for each component are listed under the picture.

SURFACE MOUNTING—Series 4000 surface intercom stations are similar to series 3000 stations except for the addition of a surface mounting enclosure (see below). All components listed on the chart below are pre-mounted at the factory. Specifications for each component are listed under the picture.

ENCLOSURES—Series 300 enclosures are designed to surface mount series 3000 intercom stations. It is finished with a neutral sand beige baked enamel. Two knockouts are provided—a combination knockout in the back of the box and a $\frac{1}{2}"$ knockout in the bottom. Two mounting holes are located so the enclosure can be mounted to a standard outlet box. This is an advantage when an existing box is too small (single gang box, handy box, etc.) to accept a series 3000 intercom station. Series 300 enclosure can be surface mounted directly to the existing box and the intercom then installed. Enclosure sizes are: 2 gang— $4\frac{1}{2}" \times 4\frac{1}{8}" \times 2\frac{1}{2}"$, 3 gang— $4\frac{1}{2}" \times 6\frac{3}{8}" \times 2\frac{1}{2}"$.

LETTERING STYLES

All lettering shown in styles A through F are stamped into the plate and filled with black paint. The height of each letter is $\frac{1}{8}"$. Styles A and B are used on series 3000 and 4000 two gang assemblies. Styles C and D are used on series 3000 and 4000 three gang assemblies. Styles E and F are used when three gang assemblies are mounted vertically. When lettering is desired, the style must be noted.

SOUND INSTALLERS CUSTOMIZING KIT

A unique custom wall plate and intercom station assembly service is now available at Soundolier. You may specify a special or a standard intercom plate. You may add any of our standard parts such as speakers and switches or special parts which we can obtain for you. The unit can be assembled and wired at the factory. Our custom department stocks almost every conceivable punch and handles all the standard materials. In addition we stamp and paint fill, silk screen or engrave to your requirements. Whether your needs are modest or large, you will find the service excellent and the cost reasonable.

To avail yourself of this service, write for our Sound Installers Customizing Kit. This unusual kit allows you to quickly and conveniently outline your requirements. A written quotation is returned to you within 48 hours after we receive a completed form.

Soundolier offers a series of sound columns combining sturdy construction with fine wood finishes, all economically priced.

A choice of three fine furniture finishes is available: walnut, fruitwood, or natural blonde. Each column is stained and provided with a lustrous finish.

The 5" loudspeakers used are specially designed for these sound columns. The low frequency response has been purposely attenuated to minimize the possibility of feedback. Thus maximum power may be employed while maintaining intelligibility. When properly placed, Soundolier columns will provide complete coverage with no "dead spots". An additional feature is the provision of a covered opening in the back of the column for mounting a matching transformer.

A hinge and chain assembly is included with each column. Using this type of mounting, the column can be properly "aimed" for best coverage.

The columns are constructed of $\frac{5}{8}$ " thick hardwood reinforced with $\frac{3}{4}$ " plywood making a total thickness of $1\frac{3}{8}$ inches. In addition the interior is lined with $\frac{1}{4}$ " acoustical padding.

| Model | Finish | Power Rating | Imp. | No. of Speakers | Speaker Size | Frequency Range | Size | Ship Wt. |
|-------|-----------|--------------|---------|-----------------|--------------|-----------------|-----------|----------|
| CR25W | Walnut | 25 Watts | 8 Ohms | 6 | 5" | 180-10 Kc | 36"x9"x8" | 35 LBS. |
| CR25F | Fruitwood | 25 Watts | 8 Ohms | 6 | 5" | 180-10 Kc | 36"x9"x8" | 35 LBS. |
| CR25B | Blonde | 25 Watts | 8 Ohms | 6 | 5" | 180-10 Kc | 36"x9"x8" | 35 LBS. |
| CR40W | Walnut | 40 Watts | 16 Ohms | 8 | 5" | 160-10 Kc | 52"x9"x8" | 45 LBS. |
| CR40F | Fruitwood | 40 Watts | 16 Ohms | 8 | 5" | 160-10 Kc | 52"x9"x8" | 45 LBS. |
| CR40B | Blonde | 40 Watts | 16 Ohms | 8 | 5" | 160-10 Kc | 52"x9"x8" | 45 LBS. |

Soundolier columns can be easily installed using the hinge and chain assembly supplied with each unit. By properly adjusting the chain, it is possible to "aim" the column for uniform coverage in the listening area. Mounting instructions are included with each column.

MICROPHONE RECEPTACLE FLOOR BOX AND COVER

The Model MRB microphone receptacle floor box and cover outdates all other models of this type.

Tools are not required to lift the lid... therefore no lost lids! The unit is furnished with a mounting plate punched for a connector of your choice or with a connector installed at the factory. A matching carpet ring is optional.

Four leveling legs are provided on a 4" octagon box.

The lid and trim cover are cast commercial red brass with a brushed finish.

NEW — Model A36-45 8", 45 ohm V.C. — 3.16 oz Al.V

All speaker-transformer models are preassembled. See below for transformer specs and on left for speaker specs. You must order in integral cartons (see last line).

TRANSFORMER SPECIFICATIONS

Primary Volts — 70.7 (25*)
Secondary — 8 ohms
Core Size — $\frac{5}{8}$ " x $\frac{5}{8}$ "
Taps — C, $\frac{1}{2}$, 1, 2, 5 watts
Power — 5 watts
Leads — Color coded, stripped and tinned

T70 — 70.7 volts
*T25 — 25 volts

4+ Speaker/Baffle System

13

FC-104 SPEAKER

Heretofore, the industry standard was the conventional eight inch speaker. That was until Soundolier's 4+.

The Soundolier 4+ Speaker. $4\frac{3}{8}$ " x $2\frac{1}{8}$ " deep. It marks a new dimension in quality. Compact size, outstanding voice and music reproduction. Perfect for low level commercial, contract and industrial use. For schools, public facilities, hospitals, anywhere a fine compact speaker is called for, the 4+ sets a new industry benchmark.

The Soundolier 4+ represents years of design research coupled with engineering skill, and innovative manufacturing techniques. The 4+ features a specially designed ceramic magnet with 10,500 Gauss, high compliance cone for fine low frequency reproduction and consistently smooth extended frequency response that could only be achieved previously with much larger speakers. And because of the Soundolier 4+ Speaker's wide angle (90°) of dispersion, economical distribution of speakers is facilitated. All this, plus a surprisingly modest cost, makes the Soundolier 4+ the new industry standard against which all other four inch speakers will be measured.

The Soundolier 4+ Speaker:

Model Number: FC-104

Power Capability: 10 watts program

Frequency Response: 60 to 18 KHz

Pressure Sensitivity: 95db (SPL
at 4 ft. from 1 watt.)

E.I.A. Sensitivity: 48db

Impedance: 8 ohms

Cone Resonance: 85 Hz

Voice Coil Diameter: $\frac{3}{4}$ "

Magnet Type: Ceramic

Magnet Weight: 10 oz.

Flux: 10,500 Gauss

Terminals: solder lugs

Baffle Opening: $4\frac{3}{16}$ " diameter

Distribution: 90°

FC 104 BRACKET

For the first time a transformer bracket has been designed which goes over the speaker to hold the transformer in proper position. The mounting bracket is supplied with all FC 104 speakers.

This bracket is furnished with all baffles that require torsion spring mounting and the catalog number is prefixed by the letter T. The bracket does not include the transformer.

The bracket cannot be purchased separately.

T730-4 RECESSED BAFFLE

This handsome, two-tone recessed ceiling baffle has been designed to simulate the style of many recessed lighting fixtures, facilitating complete ceiling continuity. A clean, overall appearance is heightened by use of torsion spring mountings, thus eliminating the need for mounting holes. The T730-4 is available with satin black matte or charcoal grey regressed interior to contrast beautifully with its polar white rim. Material: Cold Rolled Steel. Mounts to E49, PR412.

T730-4B: satin black and white

T730-4G: charcoal grey and white

**T720-4 WHITE CEILING BAFFLE**

A graceful all-white contour ceiling baffle. Specifically created to permit a cohesive ceiling continuity with detailing similar to popular modern lighting fixture trims and torsion spring mounting system to eliminate any exposed ceiling hardware. Material: Cold Rolled Steel. Mounts to: E410, PR411.

**T710-4 TOTALLY PERFORATED BAFFLE**

This white baked enamel ceiling baffle features a totally perforated surface for maximum sound projection. Ideal for use in blown, acoustically treated ceilings. Simple, clean lines, together with torsion spring mounting assembly make it a highly desirable baffle that works, inconspicuously well in a wide variety of ceiling installations. Material: Cold Rolled Steel. Mounts to: E410, PR411.

**51-4 TRIM RING BAFFLE**

A striking and economical one-piece steel rim ring baffle. Attractive hard baked white enamel finish with speaker studs for mounting a wide variety of applications. Material: Cold Rolled Steel. Mounts to: 96-4, 96-4X, 76-4.

**T51-4 RECESSED TORSION MOUNT BAFFLE**

The good looks of hard-baked white enamel on a basic functional baffle, with torsion spring mounting bracket and no visible mounting screws. Suitable for both conventional and unconventional wall and ceiling applications. Material: Cold Rolled Steel. Mounts to: E410, PR411.

**60-4 ALUMINUM TRIM RING BAFFLE**

This is a beautiful, sturdy, one-piece satin brushed aluminum baffle. Its basic, simple lines complement contemporary architectural decor. Also available in satin brass and bronze to suit your specific needs. Material: Aluminum. Mounts to: 96-4, 96-4X, 76-4.

**T60-4 RECESSED TORSION MOUNT BAFFLE**

A smart one-piece torsion spring mounted baffle. The good looks and compact size of the T60-4 can solve a great deal of design problems. Available in satin aluminum, brass and bronze finishes. Material: Aluminum. Mounts to: E410, PR411.

*Furnished with each Soundolier FC-104 speaker/transformer combination is a revolutionary new transformer/torsion spring mounting bracket. The bracket goes over the speaker to hold the transformer in the proper position. Torsion springs and bracket are also furnished with all models prefixed by T.

510-4

410-4

510-4 BI-DIRECTIONAL BAFFLE

A truly unique bi-directional baffle, with individualistic shape, compact size and appealing satin brushed aluminum finish. Sturdy construction makes it a highly desirable unit for a variety of applications, including institutional corridors. Material: Aluminum.

410-4 SURFACE MOUNTING BAFFLE

A satin brushed aluminum compact baffle that can be either wall or ceiling mounted. (Mounts to a 4" outlet box by means of keyhole slots in the rear of the housing.) Also available in satin bronze or brass finish. Material: Aluminum.

SE 198-4 SURFACE MOUNTING SQUARE ENCLOSURE

A graceful surface mounted square white baked enamel enclosure designed to fit a wide range of commercial and industrial applications. Includes heavy undercoating and special rust preventative coating for long life. Material: Cold Rolled Steel. Mounts to: 161-4.

161-4 BAFFLE TRIM SQUARE

Baked matte white steel trim square that facilitates a wide range of applications. Features include one-piece construction, mounting studs and "no leak" gasket. Material: Cold Rolled Steel. Mounts to: 198-4.

SE198-4

161-4

ENCLOSURES, PLASTER RINGS, SUSPENSION HANGERS

198-4

Square recessed enclosure. Heavy undercoat. Mounts: 161-4.

PR 411

Plaster ring for torsion spring mounted baffles. Mounts: T720-4, T710-4, T51-4, T60-4.

PR 412

Plaster ring for regressed baffles. Mounts: T-730-4.

76-4

Circular plaster rings. Specially designed for screw mounted grille. Mounts: 51-4, 60-4.

435

Suspension hanger, 1/2" steel tubing, includes all necessary hardware. Available in multiples of 1 ft. Mounts: X44.

96-4X

1/4 cubic foot recessed enclosure for quality sound. Heavy undercoating and patched jute lined. Mounts: 51-4, 60-4.

96-4

Compact recessed enclosure for screw mounting-type grille. Unique plaster flange. Undercoated and lined. Mounts to: 51-4, 60-4.

E 49

Recessed 1/4 cubic foot enclosure for torsion spring mounting of T730-4.

E 410

Recessed enclosure, 1/4 cubic foot for torsion spring mounting of T720-4, T710-4, T51-4, T60-4.

Soundolier, the originator of the pre-packaged baffle/speaker/transformer, now offers the most complete line of packages in the industry. Seventeen different baffles and six different speaker-transformer combinations are available. First, the entire package is competitive in price with the individual components. Thus, the prepackaging becomes an extra bonus. Second, the prepackaging feature saves you the labor and material expense of repacking for the job site. Your installation costs are further reduced through the use of our conveniently stripped and tinned primary leads and our enclosed wire nuts. Third, your purchase of all three components can be made with one order from one source. Your overhead is reduced and your shipments are received quickly and efficiently. Finally, your choices seem endless. Over 150 combinations are available as standard items. Special baffle/speaker combinations are available upon request and at a definite price advantage.

FD SERIES—Special package combination

Here is a value that cannot be duplicated in the sound industry. You may choose either a beautiful satin aluminum trim ring (our 60-8) or a durable baked white steel ring (our 51-8).

FD SPECIFICATIONS

Size and description 8" round
Magnet 3.16 oz. Al. V
V.C. Diameter 3/4"
V.C. Impedance 8 Ohms
Flux Density 10,000 Gauss
Sensitivity96 db
Power Handling Capacity 15 Watts Program
Frequency Response 30-15,000 cps
Depth 3 5/8"
Transformer—Volts 70.7(*25)
Transformer Size 5/8" x 5/8"
Primary Taps C,5,1,2,5

*Specify transformer volts by correct model number.

is wide in range and low in distortion and has a heavy 3.16 ounce alnico V magnet. The transformer is a large 5 watt unit with 5/8" x 5/8" core. Tinned and stripped primary leads make the installation easy and profitable. The components are high quality; the prepackaging is a bonus; and the price is so low that the purchasing of the speaker, baffle or transformer as individual units is now obsolete in our industry.

HOW TO ORDER

| Model No. | Trim Ring | Transformer | Std. Pack |
|-----------|-----------|-------------|-----------|
| FD25W | 51-8 | 25 Volts | 5 |
| FD70W | 51-8 | 70.7 Volts | 5 |
| FD25A | 60-8 | 25 Volts | 5 |

| 61-12 | 95-12 | 75-12,76-12 | 17 $\frac{1}{4}$ " |

Number following series designation indicates speaker size.

LOW CEILING RECESSED BAFFLES

68 Series

The 68 series is a brushed aluminum trim ring with a beautiful satin brushed aluminum diffractor for the elimination of beaming in low ceiling installations. Also available in satin brass or bronze (suffix with BS and BE respectively).

| Cat. No. | Encl. | Pl. Ring | Diam. |
|----------|-------------------|------------------------|--------------------|
| 68-6 | 95-6 | 75-6,76-6 | 11" |
| 68-8 | 95-8, 96-8, 199-8 | 75-8,76-8, P77-8,P78-8 | 12 $\frac{3}{4}$ " |

Number following series designation indicates speaker size.

LOUVERED RECESSED CEILING BAFFLES

66 Series

The 66 series is a louvered recessed ceiling diffuser. The standard finish is a satin steel with a baked coating resembling stainless steel.

67 Series

The 67 series is an economical recessed ceiling diffuser. The standard finish is aluminum paint. Also available in flat polar white.

| Cat. No. | Encl. | Pl. Ring | Diam. |
|----------|------------|------------------------|--------------------|
| 66-6 | 95-8, 96-8 | 75-8,76-8, P77-8,P78-8 | 12 $\frac{1}{4}$ " |
| 66-8 | 95-10 | 75-10,76-10 | 15 $\frac{1}{4}$ " |

| 67-8 | 95-8, 96-8 | 75-8,76-8, P77-8,P78-8 | 12" |

Number following series designation indicates speaker size.

LOUVERED TRIM RING AND TRIM SQUARE

162 Series

The 162 series is a beautifully brushed aluminum trim ring with the exclusively new acoustilouver molded of polystyrene. Also available in satin brass or bronze (suffix with BS and BE respectively).

18 Series

The 18 series is a square louvered recessed ceiling diffuser featuring two piece construction which eliminates bass "leak". The standard finish is aluminum paint. Also available in Polar White.

| Cat. No. | Encl. | Pl. Ring | Diam. |
|----------|-------------------|------------------------|------------------------|
| 162-6 | 95-6 | 75-6,76-6 | 11" |
| 162-8 | 95-8, 96-8, 199-8 | 75-8,76-8, P77-8,P78-8 | 12 $\frac{3}{4}$ " |
| 162-10 | 95-12 | 75-12,76-12 | 17 $\frac{1}{4}$ " |
| 162-12 | 95-12 | 75-12,76-12 | 17 $\frac{1}{4}$ " |
| 18-8 | 196-78 | -,- | 12 $\frac{1}{2}$ " sq. |

Number following series designation indicates speaker size.

WIDE ANGLE RECESSED CEILING BAFFLES

110 Series

The 110 series is a wide angle baffle which features an acoustical horn radiating the sound energy from the rear of the speaker as well as the front. The plaster ring, 4" outlet box and hardware is included. Standard finish is a polar white outer enclosure and a brushed aluminum inner enclosure. Other finishes available upon request.

| Cat. No. | O. D. | Height |
|----------|---------|--------|
| 110-6 | 14-5/8" | 5-1/2" |
| 110-8 | 16-3/8" | 5-3/4" |
| 110-10 | 20-3/4" | 8" |
| 110-12 | 20-3/4" | 8" |
| 112-8 | 20-3/4" | 8" |

Number following series designation indicates speaker size. 112-8 is identical in size to the 110-12 except provides for an 8" speaker.

ACOUSTICAL TILE REPLACEMENT BAFFLES

10 Series

The 10 series is an acoustical tile replacement to match regular or random perforations. Suffix with R when random is desired.

12 Series

The 12 series is an acoustical tile replacement without perforations.

| Cat. No. | Encl. | Pl. Ring | Diam. |
|----------|-------------------|------------------------|-----------|
| 10-8 | 95-8, 96-8, 199-8 | 75-8,76-8, P77-8,P78-8 | 12" x 12" |
| 12-8 | 95-8, 96-8, 199-8 | 75-8,76-8, P77-8,P78-8 | 12" x 12" |

Number following series designation indicates speaker size.

Thickness is 5/8" unless otherwise specified.

ACOUSTICAL TILE REPLACEMENT BAFFLES

15 Series

The 15 series is an acoustical tile replacement to simulate striated tile.

17 Series

The 17 series is an acoustical tile replacement with a louvered diffuser.

| Cat. No. | Encl. | Pl. Ring | Diam. |
|----------|-------------------|------------------------|-----------|
| 15-8 | 95-8, 96-8, 199-8 | 75-8,76-8, P77-8,P78-8 | 12" x 12" |
| 17-8 | 95-8, 96-8, 199-8 | 75-8,76-8, P77-8,P78-8 | 12" x 12" |

Number following series designation indicates speaker size.

Thickness is 5/8" unless otherwise specified.

210 Series

The 210 series is a wide angle baffle which features an acoustical horn radiating the sound energy from the rear of the speaker as well as the front. Standard finish is a flat polar white outer enclosure and a brushed aluminum inner enclosure. Other finishes available upon request.

| Cat.No. | O.D. | Height |
|---------|--------------------|-------------------|
| 210-6 | 12" | 4" |
| 210-8 | 14 $\frac{1}{2}$ " | 4 $\frac{1}{4}$ " |
| 210-12 | 18 $\frac{1}{4}$ " | 6 $\frac{1}{2}$ " |
| 212-8 | 18 $\frac{1}{4}$ " | 6 $\frac{1}{2}$ " |

Number following series designation indicates speaker size. The 212-8 is identical in size to the 210-12 except it provides for an 8" speaker.

23 Series

The 23 series is a low ceiling baffle with a polished aluminum diffractor to eliminate beaming. Adapters available for mounting to outlet boxes. The standard finish is satin brushed aluminum.

24 Series

The 24 series is a louvered ceiling baffle which blends a satin brushed body and a clear brushed steel louver. Adapters available for mounting to outlet boxes. The standard finish is satin brushed Al.

| Cat. No. | Adapter O.D. | Height |
|----------|--------------|--------------------|
| 23-6 | 182-6 | 14" |
| 23-8 | 182-8 | 16 $\frac{1}{4}$ " |
| 24-8 | 181-8 | 16 $\frac{1}{8}$ " |

Number following series designation indicates speaker size.

SURFACE CEILING BAFFLES

260 Series

The 260 series is a surface ceiling baffle with four bass reflex ports and concentric reinforcement rings. The unit may be mounted to an outlet box through an adapter or direct to the ceiling. The standard finish is satin brushed aluminum. Also available in brass (BS) or bronze (BE).

| Cat. No. | Adapter O.D. | Height |
|----------|--------------|--------------------|
| 260-6 | 183-6 | 11 $\frac{1}{4}$ " |
| 260-8 | 183-8 | 13 $\frac{1}{2}$ " |

Number following series designation indicates speaker size.

SUSPENSION BAFFLES

310 Series

The 310 series is similar to the 210 series (see 210 for specifications) except it is suspended with the 335 series (must be ordered separately). The husk is satin brushed aluminum.

315 Series

The 315 series is a spherical suspension baffle with a large volume for a smooth bass. It is suspended with the 335 series (must be ordered separately). The standard finish is satin brushed aluminum.

| Cat. No. | O.D. | Height |
|----------|--------------------|--------------------|
| 310-8 | 14 $\frac{1}{2}$ " | 8 $\frac{1}{4}$ " |
| 310-12 | 18 $\frac{1}{4}$ " | 11 $\frac{3}{4}$ " |
| 312-8 | 18 $\frac{1}{4}$ " | 11 $\frac{1}{4}$ " |
| 315-8 | 18" | 16 $\frac{3}{8}$ " |

Number following series designation indicates speaker size.

SURFACE MOUNTING WALL BAFFLES

410 Series

The 410 series is a compact satin brushed aluminum wall baffle and mounts to a 4" outlet box or direct to wall. The unit is also available in satin brass (BS) or bronze (BE).

| Cat. No. | Diam. | Depth |
|----------|-------------------|-------------------|
| 410-6 | 8" | 4 $\frac{3}{4}$ " |
| 410-8 | 9 $\frac{3}{8}$ " | 5 $\frac{1}{4}$ " |

Number following series designation indicates speaker size.

CONTROLLED DIRECTIONAL WALL BAFFLES

415 Series

The 415 series is a controlled directional surface wall baffle with separate mounting arms which eliminates front screw heads. The standard finish is sprayed aluminum paint. The unit is also available in flat polar white.

420 Series

The 420 series is a satin aluminum controlled directional wall baffle achieved through a unique metal spinning operation. The unit is also available in satin brass (BS) or satin bronze (BE).

| Cat. No. | Width | Height |
|----------|--------------------|--------------------|
| 415-8 | 10 $\frac{3}{4}$ " | 13 $\frac{3}{4}$ " |
| Cat. No. | Diam. | Depth |
| 420-8 | 12 $\frac{1}{8}$ " | 5 $\frac{3}{4}$ " |

Number following series designation indicates speaker size.

BIDIRECTIONAL CORRIDOR BAFFLES

512 Series

The 512 series is an attractive bidirectional corridor baffle. The inner chamber is designed for maximum front to back path length. The standard finish is satin brushed aluminum. Also available in satin brass (BS) and satin bronze (BE).

| Cat. No. | Height | Length |
|----------|-------------------|--------------------|
| 512-6 | 9 $\frac{1}{8}$ " | 10 $\frac{3}{4}$ " |
| 512-8 | 9 $\frac{1}{8}$ " | 10 $\frac{3}{4}$ " |

Number following series designation indicates speaker size.

BIDIRECTIONAL CORRIDOR BAFFLES

510 Series

The 510 series is a bidirectional corridor baffle. The standard finish is brushed satin aluminum. The unit is also available in satin brass (BS) or satin bronze (BE).

| Cat. No. | Diam. | Depth |
|----------|-------------------|-------------------|
| 510-6 | 8 $\frac{5}{8}$ " | 5" |
| 510-8 | 10" | 5 $\frac{1}{2}$ " |

Number following series designation indicates speaker size.

235 Series

The 235 series is an attractive heavy gauge wire guard to be used where baffle and speaker protection are necessary. The finish is bright cadmium plate.

| Cat. No. | Fits Baffle No. |
|-------------|-----------------------|
| 235-78-SN | 310-8 |
| 235-78-SE | 210-8 |
| 235-1012-SN | 310-10, 310-12, 312-8 |
| 235-1012-SE | 210-10, 210-12, 212-8 |

335 Series

The 335 series is a suspension hanger which includes a brushed aluminum canopy, a nickel plated hangstraight swivel, zinc plated 1/2" steel rod and necessary hardware. Mounts direct to an outlet box.

| Cat. No. | Length |
|----------|--------|
| 335-1 | 1' |
| 335-2 | 2' |
| 335-3 | 3' |

PROTECTIVE ENCLOSURES

95 Series

The 95 series is a cylindrical protective enclosure which is undercoated, patched jute lined and contains four triple compound KO's. The unit can be used for new or existing construction. A separate plaster ring is not needed. Greater or less length is available upon request.

| Cat No. | I.D. | Depth |
|---------|---------|--------|
| 95-6 | 8 1/4" | 4" |
| 95-8 | 9 7/8" | 4 1/4" |
| 95-10 | 12 1/8" | 7" |
| 95-12 | 14 5/8" | 7" |

180 Series

The 180 series is a channel set for suspended ceilings. It will mount to any type of enclosure.

186 Series

The 186 series is a set of adjustable mounting bars for enclosure or plaster ring positioning.

| Cat. No. | Description |
|----------|-------------|
| 180-2 | for 2' span |
| 180-4 | for 4' span |
| 186-16 | 16" span |
| 186-24 | 24" span |

181, 182, 183 Series

The 181, 182, 183 series are adapter plates designed to mount surface enclosures to an outlet box, 1900 box or gem box.

| Cat. No. | Mounts | Cat. No. | Mounts |
|----------|--------|----------|--------|
| 181-8 | 24-8 | 183-6 | 260-6 |
| 182-6 | 23-6 | 183-8 | 260-8 |
| 182-8 | 23-8 | | |

PROTECTIVE ENCLOSURES

96-8

Model 96-8 is a welded cylindrical protective enclosure incorporating an unusual plaster flange. Undercoated and patch jute lined. Has four triple compound KO's. Standard depth 4 1/4". Greater depths available on request.

| Cat. No. | Pl. Ring | I.D. | Depth |
|----------|----------|------|--------|
| 96-8 | 11 7/8" | | 4 1/4" |

199-8

Popular square enclosure designed to mount many round and square baffles. 18 ga. CRS construction, undercoated to prevent acoustical and mechanical resonance. Four compound KO's.

| Cat. No. | Dimensions |
|----------|--------------------------|
| 199-8 | 8 3/4" x 8 3/4" x 3 5/8" |

SQUARE PROTECTIVE ENCLOSURES

191, 193, 196, 197, 198 Series

The 191, 193, 196, 197, 198 series are rectangular or square enclosures with knockouts and undercoating. All units have a rust preventative coating.

| | |
|--------|----------------------------|
| 191-78 | 11 5/8" x 11 5/8" x 4" |
| 193-8 | 9 5/8" x 9 5/8" x 3 3/4" |
| 196-78 | 11 1/4" x 11 1/4" x 4 5/8" |
| 197-78 | 15 3/4" x 7 3/4" x 3 3/4" |
| 198-8 | 10 5/8" x 10 5/8" x 3 3/4" |

Note: 191-78 and 198-8 available for surface mounting: prefix with SM.

Our complete line of Plaster Rings and Plaster Frames can be found on Page 4.

Plaster Rings and Plaster Frames for our new 4+Speaker and Baffle line are on Page 16.

CLOCK-SPEAKER BAFFLE ENCLOSURES

192, 194, 195 Series

The 192, 194, 195 series are rectangular enclosures used on various clock baffles. They all have knockouts, undercoating and a rust preventative finish.

| Cat. No. | Dimensions |
|----------|------------------------|
| 192-89 | 26 1/4" x 12 1/8" x 3" |
| 192-812 | 33 1/2" x 16" x 3" |
| 194-89 | 24 1/2" x 12" x 3" |
| 194-812 | 31 3/4" x 15 7/8" x 3" |
| 195-89 | 24" x 12" x 3" |
| 195-812 | 31 1/4" x 15 7/8" x 3" |

E850 Series

The Model E850 is a 16 ga. C.R.S. recessed enclosure divided into three sections, with switch area subdivided.

| Cat.No. | Dimensions |
|---------|--------------------|
| E850 | 31" x 15 1/2" x 3" |

PLASTIC BAFFLES AND PLASTER RINGS

Soundolier P Series baffles are made of high impact polystyrene plastic in attractive polar white. Acoustical louvers are designed for maximum sound transmission and dispersion. Hidden self-tapping screws mount standard 8" speaker.

| Cat. No. | Encl. | Pl. Ring | Dimen. |
|----------|-------|--------------------------|--------------|
| P900 | 95-8 | P77-8, P78-8, 75-8, 76-8 | 12 3/4" Dia. |
| P910 | 193-8 | | 10 1/2" sq. |
| P912 | 198-8 | | 12 1/2" sq. |

Soundolier P Series plaster rings are made of high impact polystyrene plastic. May be used in new or existing construction. For existing construction, simply cut 12" diameter hole, snap ring at "break slot" and thread plaster ring in position. The P78-8 exhibits extended mounting bars for ease of installation.

| Cat. No. | I. D. |
|----------|---------|
| P77-8 | 10 3/4" |
| P78-8 | 10 3/4" |

800 Series

The 800 series is a high fidelity bass reflex wall baffle with a beautiful polystyrene plastic louver. The unit consists of three parts, a beautifully polished steel frame, a modern polystyrene acoustilouver grille and a braced and undercoated mounting plate. Available finishes are brass, bronze and clear polished steel. The plaster frame must be ordered separately.

Cat. No. Pl. Frame Dimen.

| | | |
|--------|-----|-----------|
| 800-8 | 178 | 27" x 19" |
| 800-12 | 178 | 27" x 19" |

Number following series designation indicates speaker size.

820 Series

The 820 series is a combination clock and speaker baffle with a unique polystyrene louver and an offset panel for better sound coverage and light reflection on the clock. A double action spring system and hinge avoids the use of tools in servicing. The panel finish is flat polar white. The clock is not furnished-name of clock and model must be furnished for proper mounting.

Cat. No. Encl. Dimen.

| | | |
|---------|---------|---|
| 820-89 | 192-89 | 26 $\frac{1}{2}$ " x 14 $\frac{1}{8}$ " |
| 820-812 | 192-812 | 34" x 18" |

Number following series designation indicates speaker size and clock size respectively.

ECONOMICAL CLOCK-SPEAKER WALL BAFFLE

830 Series

The 830 series is a combination clock and speaker baffle with a double action spring system that eliminates tools when servicing. The panel finish is flat polar white. The clock is not furnished-name of clock and model must be furnished for proper mounting.

Cat. No. Encl. Dimen.

| | | |
|---------|---------|---|
| 830-89 | 194-89 | 26 $\frac{1}{2}$ " x 14" |
| 830-812 | 194-812 | 33 $\frac{3}{4}$ " x 17 $\frac{7}{8}$ " |

Number following series designation indicates speaker size and clock size respectively.

RECESSED CLOCK-SPEAKER WALL BAFFLE

840 Series

The 840 series is a combination clock and speaker baffle with an attractive perforated front and a sub plate for proper acoustical design. The panel finish is flat polar white. The clock is not furnished-name of clock and model must be furnished for proper mounting.

Cat. No. Encl. Dimen.

| | | |
|---------|---------|---|
| 840-89 | 195-89 | 26 $\frac{1}{2}$ " x 13 $\frac{5}{8}$ " |
| 840-812 | 195-812 | 33 $\frac{3}{4}$ " x 17 $\frac{7}{8}$ " |

Number following series designation indicates speaker size and clock size respectively.

RECESSED TORSION SPRING BAFFLES

T610 and T620 Series

The T610 and T620 series are attractive torsion spring baffles, round and square respectively. The T610 is a satin brushed steel trim ring with a clear hard baked varnish coating. The T620 is a flat polar white trim square with a separate mounting plate to avoid bass leaks.

Cat. No. Encl. Pl. Ring Dimen.

| | | | |
|--------|--------|--------------|------------------------|

Number following series designation indicates speaker size.

RECESSED CLOCK-SPEAKER-CONTROL PANEL

850 Series

The Model NC850 is a combination clock panel, loudspeaker baffle and control panel. Mounts any clock (indicate model) and any 8" speaker. Locked hinged door and provisions to mount thermostat, toggle light switches and "call-in" switch. Indicate holes desired. Finish is dark brown and light beige. The model E850 is a matching recessed enclosure divided into three sections, with switch area subdivided.

| Cat. No. | Dimensions |
|----------|--|
| NC 850 | 33 $\frac{1}{4}$ " x 17 $\frac{3}{4}$ " x 1" |
| E 850 | 31" x 15 $\frac{1}{2}$ " x 3" |

Control Panel Hole Specs.

| | |
|--------------|---|
| Thermostat | 5 $\frac{1}{8}$ " |
| Light Toggle | 13/32" x 1 $\frac{1}{8}$ " |
| Call-In Hole | 3 $\frac{1}{8}$ ", 1 $\frac{1}{2}$ " or 5 $\frac{1}{8}$ " |

STANDARD MODELS WITH TORSION SPRING OPTION

Soundolier now offers the new torsion spring mounting for a number of the most popular models in our line. You may choose from eleven of your favorite styles. The appearance of each model remains the same. Only the baffle mounting holes are removed. If you are concerned with labor costs on the job, these new units are your answer. The proper enclosure and plaster ring for each model is shown on the right. All models accommodate an eight inch speaker.

BI DIRECTIONAL

MODEL VP510-B

Model VP510-B is a unique bi-directional baffle which features vandal-proof construction and vandal-proof design. The housing is constructed of 11 gauge tempered aluminum plate, rolled and heliarc welded for maximum strength and rigidity. In addition to this extremely sturdy housing, the speaker grilles located on each end of the housing, are cast from a high tensile, self-aging aluminum alloy, which has a tensile strength of 44,000 lbs. P.S.I. — twice that of conventional aluminum castings.

For added security, the screen used in the speaker grille section, is fabricated of a special stainless steel woven wire mesh. This screen will eliminate any possibility of rupturing to gain access to the speaker cone. The canopy used for mounting to a standard electrical box, is also cast of heavy aluminum.

Total security is completed by use of special heat treated alloy tamper proof screws. A special wrench will be supplied with each shipment.

The housing is finished in a beautiful satin aluminum with a clear baked epoxy coating. The canopy is a contrasting satin black baked enamel.

Model VP510-B is designed for use with any standard 8" loudspeaker. SOUNDOLIER can furnish as optional equipment, special adapter rings designed for mounting various horns instead of a conventional cone speaker. Consult specification sheet for details.

| Model No. | Mounting | Dimensions |
|-----------|---|--|
| VP510-B | Bi-directional ceiling or wall mounting | 10" dia. x 8" deep x 11" projection |

MODEL VP410-S

SURFACE

MODEL VP410-S

Model VP410-S is a vandal-proof surface mounted ceiling or wall baffle designed for use with any standard 8" loudspeaker. The housing is constructed of 11 gauge tempered aluminum plate, rolled and heliarc welded for maximum strength and rigidity. In addition to this extremely sturdy housing, the speaker grille section is cast from a high tensile, self-aging aluminum alloy, having a tensile strength of 44,000 lbs. P.S.I. — twice that of conventional aluminum castings. To prevent access to the speaker cone, a special stainless steel woven wire mesh is incorporated into the speaker grille, for added security.

This uni-directional baffle can be mounted to a standard electric outlet box by means of keyhole slots located on the rear of the housing. Additional mounting holes are also provided to permit mounting to the structural part of a building by means of anchors. To prevent any possibility of tampering from the rear of the baffle, the rear has been heliarc welded and slightly regressed to permit the edges of the baffle to be drawn tightly against the ceiling.

Total security is completed by use of special heat treated alloy tamper-proof screws. A special wrench will be supplied with each shipment. The baffle is finished in a beautiful satin aluminum with a clear baked epoxy coating.

SOUNDOLIER can furnish as optional equipment, special adapter rings for mounting various horns instead of a conventional cone speaker. Consult specification sheet for details.

| Model No. | Mounting | Dimensions |
|-----------|-----------------|--------------------|
| VP410-S | Ceiling or wall | 10" dia. x 7" deep |

MODEL VP60-R

RECESSED

MODEL VP60-R

Model VP60-R is a truly vandal-proof recessed grille designed for use with any standard 8" loudspeaker. This attractive grille offers total security from direct blows to the grille or tampering to gain access to the speaker. This security is accomplished by use of a casting of a high tensile, self-aging aluminum alloy, which has a tensile strength of 44,000 lbs. P.S.I. — twice that of conventional aluminum castings. In addition, the speaker screen is a special stainless steel woven wire mesh, impervious to direct blows, thus preventing damage to the speaker cone.

Total security is completed by use of special heat-treated alloy tamper-proof screws. A special wrench will be supplied with each shipment.

Finish is satin aluminum with a clear baked epoxy finish.

SOUNDOLIER can furnish as optional equipment, special adapter rings designed for mounting various horns instead of a conventional cone speaker. Consult specification sheet for details.

| Model No. | Mounting | Enclosure | Dimensions |
|-----------|----------|-----------|------------------------|
| VP60-R | Recessed | 96-8 | 12 3/4" dia. x 1" deep |

Series 100 Cabinet Relay Racks are designed for standard 19" panels. Constructed of 16 ga. CRS throughout. Rear door lock and low profile handle included. 10-32 Tinnerman U nuts and pan head screws for panel mounting are provided. Internal louvers for improved ventilation. Standard finish grey hammertone over phosphate coating. $\frac{3}{4}$ " knockout located at rear top and bottom (Soundolier exclusive). Shipped knocked down only. Hardware and instructions included.

OPTIONS:

Series TMR tapped panel mounting rails for 10-32 screws. Available fac-

tory welded, only. Specify models TMR-36, TMR-42, TMR-61, TMR-70 or TMR-77.

Series 110 Front Door—mounted on a ridged continuous hinge. May be ordered with or without cabinet. See specification chart for model numbers.

Series PT Panel Trim—stainless steel trim for covering panel mounting hardware. Complete with fasteners. Specify model PT-36, PT-42, PT-61, PT-70 or PT-77.

TRANSMITTER RACKS

Series 200 Transmitter Racks are designed to mount standard 19" panels. Constructed of 16 ga. CRS throughout. Front and rear door handles and cylinder locks provided (locks keyed differently for security). Modern internal louvers for improved ventilation. Panel mounting angles are adjustable to any distance from front. Panel angles are mounted to three sturdy channel slides per side. 10-32 Tinnerman U nuts and pan head screws for panel mounting are provided. Knockouts are located at rear, top and bottom (Soundolier exclusive). Standard grey hammertone

finish over phosphate coating. Consult price list for other colors available at no extra cost. Shipped knocked down complete with hardware and instructions.

200 & TMR SERIES

SECTIONAL WALL MOUNTING CABINETS

Series 300 Sectional Wall Cabinets are designed for standard 19" rack panels. Entire cabinet is constructed of 16 ga. CRS. Back and front sections are one piece construction with angle braces at each corner. All seams and miters are electric welded and ground smooth. Center cabinet is strengthened with 16 ga. braces at each corner. Three larger models have 11 ga. mounting supports on back section. Removable pin hinges for easy assembly and hinges are bolted to cabinet section for

greater strength. Knockouts and internal louvers are two Soundolier exclusives. Center section and rear section are secured with one-quarter turn camlocks and alignment pins. Front section is complete with cylinder lock. All models have tapped panel mounting rails and 10-32 pan head screws for panel mounting. Standard finish is grey hammertone over phosphate coating. Consult price list for other colors at no additional cost. Shipped completely assembled.

400 SERIES

The WA100 series cabinet relay rack is constructed of 16 gauge CRS and shipped completely assembled. Construction is all welded for additional strength and for a neater appearance. Prior to painting, each cabinet is given a phosphate treatment for rust prevention and excellent paint adhesion. All other specifications such as dimensions and sizes available are the same as standard series 100.

| Model No. | Panel Space |
|-----------|--------------------|
| WA100-36 | 36 $\frac{3}{4}$ " |
| WA100-42 | 42" |
| WA100-61 | 61 $\frac{1}{4}$ " |

MONITOR PANELS

MVX-193

MX-193

MVX-1910

MX-1910

MODEL MVX-193

The model MVX-193 monitor panel is a compact (3 $\frac{1}{2}$ ") CRS panel and is designed to be used with any multi-channel commercial or industrial sound system. It will provide acoustical and visual monitoring instantly with the turn of a switch. A double pole, six position switch with an attractive brushed aluminum inlay knob is wired to supply five different program channels with a sixth "off" position. Each channel conveniently connects to two screw terminals on the rear of the panel to provide balanced switching. All wiring to the external terminals is completed at the factory. Either a 70 volt or 25 volt line may be monitored. The monitor channel switch is conveniently mounted on a black plate with attractive white silk screened nomenclature and then is separately mounted to the panel. Through this arrangement, a free choice of colors to match any system is available.

A 3" speaker with transformer is used for aural monitoring. The speaker is connected through a continuous rotation potentiometer for proper level selection in monitoring. The control is mounted on the same plate as the channel selector switch. The speaker grille is attractively raised and contributes handsomely to the modern look of the entire unit.

The VU meter is recessed in the panel and provides a clean, crisp appearance. A long life black thermoplastic case blends well with the black selector switch, volume control inset. A rear adjustment provides the capability to set the meter at a 0 db

level on a 70 volt or 25 volt line. A zero adjust on the face of the meter completes its flexibility.

Since the switch and control panel is a separate plate, any electronic equipment cabinet color may be selected. See the complete color list in the cabinet section of your Soundolier price list. If a color is not specified, Soundolier grey hammertone will be used. A set of instructions is provided with each unit.

MODEL MX-193

The model MX-193 is identical with the model MVX-193 except the VU meter is not provided. All other specifications remain the same.

MODEL MVX-1910

The model MVX-1910 is identical with the MVX-193 except the panel is 10 $\frac{1}{2}$ " high instead of 3 $\frac{1}{2}$ " high. In addition, the monitor speaker is an 8" unit rather than a 3" unit. All other specifications remain the same.

MODEL MX-1910

The model MX-1910 is identical with the MVX-1910 except a VU meter is not provided. All other specifications remain the same.

AC POWER PANELS

ACR-193

ACK-193

MODEL ACR-193

The model ACR-193 master power panel is designed to provide a single switch which controls all AC power in any industrial or commercial sound system. The main switch is a DPST rocker type and is capable of switching both sides of the power line. A red jewel, long life, neon pilot lite indicates visually whether the AC power is on or off. Eight AC outlets are provided with six controlled by the main switch and the remaining two uncontrolled. Each outlet is grounded (3 contacts). A 15 amp fuse is included. A hole is provided for the connection of $\frac{1}{2}$ " conduit to the rear of the panel. All wiring is completed at the factory. Almost any finish is available (see the cabinet section of your current Soundolier price list.) If the finish is not specified, Soundolier grey hammertone will be used. An instruction sheet is provided with each unit.

MODEL ACK-193

The model ACK-193 is identical to the model ACR-193 except for the use of a DPST key switch. This prevents unauthorized personnel from turning the entire system off or on. Two keys are provided with each unit. All other specifications remain the same.

| SD10-165 | 10 $\frac{1}{2}$ " | 16" | 100,200 |

SHELF ASSEMBLY

Model SH19-7 shelf assembly is constructed of 16 ga. CRS and is easily mounted to the panel mount rails of all standard 19" racks. Requires 7" of panel space. Ideal for mounting equipment that does not have rack mount facilities. Available in many standard baked enamel colors. Consult your current price sheet. Dimensions — 17 $\frac{1}{2}$ " x 14" x 7" high.

ROLLER TRUCK

Model CT1020 roller truck is constructed of 16 ga. CRS and is designed for Soundolier's 100, 200, WA100 and WA200 series cabinets. Fitted with four 3" ball bearing casters. Front casters are locking type. Load capacity is 400 lbs. Consult your current price sheet for standard finishes. Dimensions — 24 13/16" wide x 21" deep.

1/16" STEEL BLANK PANELS

S19 series panels are constructed of 1/16" CRS. Two sides of the panel are formed for rigidity. The panel mount holes are round for a neater appearance. Consult price list for standard colors.
